

gustav innovation corporate gifts

Many companies are already using Fjäder™ as a gift, both for customers and employees. People are very impressed by its nice design and are therefore inclined to place it where it can be seen. Also, the surface of Fjäder™ is far better to print on compared with traditional round pens.

Our pen Slända™ is easy to customize and you can be sure that it will be noticed. There are few pens in the world that stands out in the same way. You can order Slända™ in a color of your choice (volume related) and of course print a logo or message on it.

All products from Gustav Innovation can be used for corporate branding. The adjustments can be made in several ways. Contact your local reseller/distributor and let them know what you are looking for – they are most likely able to fulfill your needs. Available methods for customization are for example tampon printing, digital print and laser engraving.
